 mailed-by: gmail.com

Dear Tayla Hamlet

Thank you for your

I can assure you that the three different sites

As outlined in my last aware that the Landcare grant is government funded.

- The project activities will stay unchanged from our submission.
- In respect to the reduced project site I would like to ask for an extension of the project time frame. The area of full size gorse to be mulched will take time after mulching for the regrowth to grow through the mulch. This would enable us to repeat treatment of the regrowth as required depending on the weather situation and not to a predetermined project dead line. A possible extension of the time frame, say to the end of 2021 would enable us to utilise the existing grant amount in full.

I would like to suggest that we then organise a public field day in 2021 with specific focus on the CEP grant and its achievements.

Please let me know if you have any further questions and don't hesitate to call me if necessary.

Thank you and kind regards

Daniel Steiner
