

Hi Everyone,

The UTAS Landcare Group are planning to visit us on the weekend of the 19th & 20th March to help with weed control and preparation for the next round of planting in the Seymour Wetland Restoration Project.

It is a great opportunity for local people to meet the young dynamic team with their abundant energy and passion for Landcare and the future of the environment.

We will start at 10am Saturday morning and continue over the weekend.

Morning tea will be provided. BYO lunch, water will be available.

Please bring secateurs, loppers, dabbers and weeding equipment. There is a limited number of tools and gloves here, but maybe not enough to go around.

PWS require all volunteers working on Public Land to be registered with them. Here is the link:

<https://app.betterimpact.com/Application?OrganizationGuid=aa3c186c-ebde-4f84-9091-6abaef6dc2be&ApplicationFormNumber=1>

The UTAS team will camp overnight out at our place on the Point, where we will have a communal dinner and a few drinks to celebrate our recent Landcare Award with the UTAS team who have been a great support.

We will go back out for a second round of weeding on Sunday.

You are welcome to join us at any time that suits. Either in the Project area for some Landcare or on the Point on Saturday evening for a celebration.

With the reclassification of the Project area proposal now completed by PWS, (for area to again be part of the Seymour Conservation Area) the next is the proposal being forwarded to Minister Jacqui Petrusma.

It's timely to be putting community focus on the Project area at this time. We are continuing to source funding to assist with more planting, slashing and contract spraying.

Please let us know if you are able to join us and a plate to share would be great.

We will supply wine from the Woobly Boot Vineyard.

Feel free to join us any time after 5pm on Saturday for a pre-dinner drink & catch up.

Kind regards,

Kerryn and Quentin Smith
